Project Engineer or Geologist

Roux Associates is seeking a PROJECT GEOLOGIST OR ENGINEER for an exciting opportunity in our growing Los Angeles office. You will work with Fortune 500, development, legal and public sector clients to help them solve their most challenging environmental issues. The position presents an opportunity to advance quickly in both technical and project management roles. The successful candidate will be someone with significant field experience and excellent project management skills. The position is intended for an individual with strong technical skills, but who can also effectively communicate with clients, regulators, and subcontractors.

Primary Responsibilities

- Perform field and office work for traditional assessment and remediation projects and collaborate with the Office Manager and Principals to service clients and complete projects on time and on budget

Tasks Performed

- Field management of soil, soil vapor and groundwater sampling; health and safety monitoring and remediation implementation
- Development and management of project scopes, schedules and budgets
- Preparation and review of regulatory and technical reports
- Client and regulatory authority communications
- Delegation of project work and training of junior staff
- Quality control of project deliverables to ensure project profitability

Desired Education

- Bachelor's required; Master's preferred
 - Environmental, Civil or Chemical Engineering OR Geology, Earth Science
- Desired Job Experience
- 5 – 8 years environmental consulting experience
 - Experience with field characterization and remediation systems
 - Knowledge of remediation equipment, processes and maintenance
 - Ability to lead contractors, co-workers and other professionals in a project and task management capacity to complete project scopes on time and on budget
 - Participation with client development, proposal preparation and sales presentations
 - Strong written and verbal communication with technical writing experience
 - Knowledge of Microsoft Word, Excel, Power Point and Access
 - Experience with databases and GIS preferred

Certifications

- Valid driver's license (no DUI/DWIs)
- PE or PG preferred
- OSHA HAZWOPER 40 hour training
