

Environmental Engineer or Geologist

Position Title

Engineer or Geologist (Staff and Staff Assistant Levels)

Position Description

Roux Associates, Inc., a national consulting and management firm headquartered in Islandia, New York, seeks entry-level environmental/civil engineers and geologists who will work on projects related to the investigation and environmental remediation of industrial and commercial sites, primarily in the New York metropolitan area.

- Site investigation including environmental sampling of soil, soil vapor and groundwater
- Health and safety monitoring
- Oversight of drillers and remediation subcontractors
- 60% to 80% of time will be on field assignments for first two years
- Review of field data and preparation of data evaluation reports
- Assist with cost estimating, report preparation and task management as required by the project manager

Additional responsibilities for engineers:

- Evaluation and optimization of existing remediation systems
- Design and construction inspection of remediation processes and systems
- Perform and check engineering calculations
- Prepare engineering drawings, specifications and scopes of work for construction.

Candidates should be prepared for professional growth into areas such as assessment of remedial alternatives, management of various investigative and engineering tasks, conceptual plans, and regulatory agency interaction. Work may also involve innovative treatment technologies such as in situ oxidation, bioremediation, constructed wetlands and phytoremediation. Excellent teamwork and organizational skills are required.

Position Requirements

Successful candidates MUST have:

- B.S. degree in geology, engineering or related field
- Excellent interpersonal skills
- Excellent writing and communication skills
- Strong motivation to produce quality work products on budget and on schedule
- Personal vehicle with capability to travel around New York region and occasionally outside the area
- Valid driver's license (no DUI/DWIs).

Note: This is a safety sensitive position and requires drug testing as a condition of employment.

Preferred Qualifications

- M.S. degree in geology, engineering or related field
- Experience with hazardous waste site investigation and remediation
- Experience with oversight of contractors
- HAZWOPER certification

Note: Roux Associates will arrange for and pay for required training including 40 hour HAZWOPER (Hazardous Waste Operations and Emergency Response) training per 29 CFR 1910.120.

Benefits

We offer a comprehensive benefits package which includes:

- Competitive salary, commensurate with experience
- Annual bonus based upon performance
- Medical, Dental, Vision, Health Savings Account, Flexible Spending
- Life and Disability Insurance
- 401(k) Plan
- Paid Time Off

Roux Associates, Inc. is a privately held environmental consulting firm founded in 1981. Services provided include site investigation, risk assessment, conceptual and final design, regulatory permitting and compliance support, litigation support, and construction management
