Re: SPDES Permit Modification – Response to Comments (Sections I and II)
Groundwater Treatment Facility Consolidation
ExxonMobil Oil Corporation
ExxonMobil Greenpoint Petroleum Remediation Project
Greenpoint, Brooklyn, New York
SPDES Permit # NY0267724

Dear Mr. Watts:

Roux Environmental Engineering and Geology, D.P.C. (Roux), on behalf of ExxonMobil Environmental and Property Solutions Company, on behalf of ExxonMobil Oil Corporation (collectively, ExxonMobil), has prepared this response to the January 26, 2024 comment letter provided by the New York State Department of Environmental Conservation (NYSDEC) regarding the State Pollutant Discharge Elimination System (SPDES) Permit Modification Application Package for the ExxonMobil Greenpoint Petroleum Remediation Project (EMGPRP), dated December 11, 2023. The SPDES Permit Modification Package proposed a modification of the existing SPDES Permit No. NY0267724 to allow for consolidation of the two existing groundwater treatment facilities into one new groundwater treatment facility to be constructed at 38 Varick Street, Brooklyn, New York, where the combined flow from all existing recovery wells will be sent for processing with final discharge to Outfall 002.

This response to comments letter addresses Section I (NY-2C) and Section II (Additional Submittals) of the NYSDEC's comments. Section III of the NYSDEC's comment will be addressed in a separate submittal. The format of this response is to provide the NYSDEC comment in italic font, followed by Roux's response. The comment and response are provided below.

I. NY-2C:

a. Part II Section 9 Item 1: *The applicant indicated that no Whole Effluent Toxicity (WET) testing was performed in the past three years. The currently effective permit has WET testing with a schedule of testing to be performed in years ending in 0 and 5. WET testing should have been performed in 2020. Please revise this section of the application and provide that data.*

Response to Comment I.a.:

WET testing was carried out during March, June, September, and November of 2020, more than three years prior to submittal of SPDES Permit Modification Application Package in December 2023. The WET testing results previously submitted to NYSDEC in 2020 has been attached to this response for your records as Attachment A. Based on NYSDEC's comment, the response has been revised to "yes" in Part II Section 9.1 of the NY-2C form; and Part II Section 9.2 has been revised to include the required information. A revised NY-2C form has been attached to this letter as Attachment B.

0172.0030Y093.5093/LR

b. Part II Section 12 Item 2: *Please ensure that the role of personnel signing the application form aligns with requirements listed in 40 CFR 122.22(a).*

Response to Comment I.b.:

Michael Burghardt is the responsible corporate officer certifying the application and is authorized to make management decisions that govern the operation of the regulated facility in accordance with 40 CFR 122.22(a).

c. Table A Section 1: *Mercury samples were analyzed using EPA Method 245.1. This method is not sufficiently sensitive; therefore, these mercury results cannot be accepted. Please resample and ensure that samples are analyzed using method 1631E.*

Response to Comment I.c.:

Subsequent sampling of Outfall 01A, and Outfall 002 was carried out in January 2024 and analyzed for Low level Mercury via EPA Method 1631E at Eurofins Environmental Testing Labs. A revised Table A has been included within the attached revised NY-2C application (Attachment B), reflecting the reported results associated with the January 2024 sampling event. Lab reports associated with these sampling events have been included as Attachment C.

d. Table A Section 2: *No effluent data was provided for Table A Section 2. Please sample and provide results. Provided attached.*

Response to Comment I.d:

Subsequent sampling of Outfall 01A and Outfall 002 was carried out on November 28-30th, 2023 and analyzed for PFAS via EPA Method 1633, 1,4 -Dioxane via EPA Method 8270E_SIM and Total Organic Compounds (TOC) via EPA Method 9060A at Eurofins Environmental Testing Labs. A revised Table A Section 2 has been included within the attached revised NY-2C application (Attachment B), reflecting the reported results associated with the November sampling events. Lab reports associated with these sampling events have been included as Attachment C.

e. Table F and Water Treatment Chemical (WTC) Notification Forms: *Table F lists three separate WTCs; however, three notification forms were submitted in duplicate for one WTC. Please submit one notification form for each WTC.*

Response to Comment I.e:

The notification forms for each WTC - Redux E50, Redux P-853 and Redux 375 - have been attached to this response letter as Attachment D for your records.

II. Additional Submittals:

a. Detailed Mixing Zone Form – Outfall Location & Configuration: *Under the section titled "Describe the outfall (location, size, configuration, condition of the structure)" Outfall 002 is described as a 6" diameter PVC pipe. However, under the section titled "Option #1: Bank Discharge" the outfall pipe is described as a 36" diameter pipe. Please clarify.*

Response to Comment II.a.:

Detailed Mixing Zone Form section "Outfall Location and Configuration," specifically the section titled "Option #1: Bank Discharge" has been revised to correctly describe the discharge pipe as being 6 inches in diameter. A revised "Detailed Mixing Zone Form has been attached to this letter as Attachment E for your records.

b. *Consideration of Future Physical Climate Risk:* *Please fill out this supplemental form which can be found on DEC's SPDES Application Procedures and Forms webpage (*https://dec.ny.gov/sites/default/files/2023-11/spdesclimaterisk.pdf*).*

Response to Comment II.b.:

The Supplemental form 70-0117 "Demonstration: Consideration of Future Physical Climate Risk," has been completed and attached to this response letter as Attachment F.

c. *Long Island Well Permit Modification**: Please submit a Long Island Well permit modification to reflect the proposed revised locations of the groundwater extraction wells and any other changes to the activities authorized in NYSDEC Permit #2-6101-00107/00027.*

Response to Comment II.c.:

As per email correspondence from NYSDEC dated February 9, 2024, a Long Island Well Permit Modification will be submitted at a later date following resolution of a proposal to relocate two existing recovery wells, RW-16 and RW-29. Additional details of this proposal are provided in the Recovery Well RW-16 and RW-29 Relocation Request dated September 18, 2023, to which comments were provided from the NYSDEC on January 9, 2024. Relocation of these two recovery wells will not affect the scope of the SPDES Permit Modification.

Should you have any questions, or comments relating to any part of this submission, please do not hesitate to reach out to us at your convenience.

Respectfully submitted,

ROUX ENVIRONMENTAL ENGINEERING AND GEOLOGY, D.P.C.

Attention: Ms. Nicole Wright

Re: Acute Whole Effluent Toxicity Testing Report – March 2020
SPDES Permit No. NY-0267724
ExxonMobil Greenpoint Petroleum Remediation Project
Greenpoint, Brooklyn, New York

Dear Ms. Wright:

ExxonMobil Oil Corporation is submitting this Acute Whole Effluent Toxicity (WET) Testing Report for the On-Site Free-Product Recovery System (RCS) and the Off-Site Free-Product Recovery System (ORS) for the First Quarter of 2020, in accordance with the requirements of the New York State Department of Environmental Conservation (NYSDEC) State Pollution Discharge Elimination System (SPDES) Permit, No. NY-0267724, issued by the NYSDEC, effective April 1, 2015.

American Aquatic Testing, Inc., on behalf of Alpha Analytical, performed two static-renewal acute toxicity tests for the Outfalls 001 and 002 by exposing mysid (i.e., *Mysidopsis bahia*) and sheepshead minnow (i.e., *Cyprinodon variegatus*) to the samples for forty-eight hours in a static-renewal test system. All results indicate no exceedances, as shown in the laboratory analytical results attached hereto.

The Outfall 001 discharge was sampled on March 25, 2020, for the purpose of performing acute WET testing, operating at a flow rate of approximately 378 gpm, or 0.54 MGD. The Outfall 001 discharge was sampled again on March 26, 2020, for the purpose of renewing the acute toxicity test sample, operating at a flow rate of approximately 416 gpm, or 0.60 MGD. The Outfall 001 discharge sample results indicate no exceedances of toxicity limits with a toxicity unit-acute (TUa) of 0.3 as there is no statistically significant toxicity in 100% effluent compared to the control, as shown in the attached laboratory analytical results.

The Outfall 002 discharge was sampled on March 25, 2020, for the purpose of performing acute WET testing, operating at a flow rate of approximately 255 gpm, or 0.37 MGD. The Outfall 002 discharge was sampled again on March 26, 2020, for the purpose of renewing the acute toxicity test sample, operating at a flow rate of approximately 265 gpm, or 0.38 MGD. The Outfall 002 discharge sample results indicate no exceedances of toxicity limits with a toxicity unit-acute (TUa) of 0.3 as there is no statistically significant toxicity in 100% effluent compared to the control, as shown in the attached laboratory analytical results.

Should there be any questions or comments on this submission, please do not hesitate to contact me at 718-404-0652.

Sincerely,

Frank Messina
Project Manager

Attention: Ms. Nicole Wright

Re: Acute Whole Effluent Toxicity Testing Report – June 2020
SPDES Permit No. NY-0267724
ExxonMobil Greenpoint Petroleum Remediation Project
Greenpoint, Brooklyn, New York

Dear Ms. Wright:

ExxonMobil Oil Corporation is submitting this Acute Whole Effluent Toxicity (WET) Testing Report for the On-Site Free-Product Recovery System (RCS) and the Off-Site Free-Product Recovery System (ORS) for the Second Quarter of 2020, in accordance with the requirements of the New York State Department of Environmental Conservation (NYSDEC) State Pollution Discharge Elimination System (SPDES) Permit, No. NY-0267724, issued by the NYSDEC, effective April 1, 2015. The SPDES permit (NY 0267724) issued on April 1, 2015 expired on March 31, 2020. A renewal application was submitted to the NYSDEC on September 30, 2019. ExxonMobil received notification from the NYSDEC on October 4, 2019, indicating that the request for renewal was timely and sufficient and is pending review and, until that time, the current permit is to remain in effect, in accordance with the State Administrative Procedures Act. All results indicate no exceedances, as described below.

American Aquatic Testing, Inc., on behalf of Alpha Analytical, performed two static-renewal acute toxicity tests for the Outfalls 001 and 002 by exposing mysid (i.e., *Mysidopsis bahia*) and sheepshead minnow (i.e., *Cyprinodon variegatus*) to the samples for forty-eight hours in a static-renewal test system. All results indicate no exceedances of the respective SPDES Permit action levels, as shown in the laboratory analytical results attached hereto.

The Outfall 001 discharge was sampled on June 16, 2020, for the purpose of performing acute WET testing, operating at a flow rate of approximately 307 gpm, or 0.44 MGD. The Outfall 001 discharge was sampled again on June 17, 2020, for the purpose of renewing the acute toxicity test sample, operating at a flow rate of approximately 380 gpm, or 0.54 MGD. The Outfall 001 discharge sample results indicate no exceedances of toxicity action levels specified in the SPDES Permit for Outfall 001. As shown in the attached laboratory analytical results and below table, there was no statistically-significant toxicity in 100% effluent compared to the control, so the toxicity unit-acute (TUa) was determined to be 0.3 for both the opossum shrimp and the sheepshead minnow test, in accordance with the WET Testing evaluation procedure described in the attached laboratory results.

The Outfall 002 discharge was sampled on June 9, 2020, for the purpose of performing acute WET testing, operating at a flow rate of approximately 364 gpm, or 0.52 MGD. The Outfall 002 discharge

was sampled again on June 10, 2020, for the purpose of renewing the acute toxicity test sample, operating at a flow rate of approximately 309 gpm, or 0.44 MGD. The Outfall 002 discharge sample results indicate no exceedances of toxicity action levels specified in the SPDES Permit for Outfall 002. As shown in the attached laboratory analytical results and below table, there was 95% survival in 100% effluent compared to the control, so the TUa was determined to be <1.0 for both the opossum shrimp and the sheepshead minnow tests, in accordance with the WET Testing evaluation procedure described in the SPDES Permit.

Should there be any questions or comments on this submission, please do not hesitate to contact me at (718) 404-0652.

Discharge Location	Species	Analysis Type	Action Level (TUa)	48-Hr LC_{50} (% Effluent)	Survival in 100% Effluent (%)	Calculated TUa[1]	In Compliance
Outfall 001	Opossum Shrimp	Invertebrate	1.8	>100	100	0.3[2]	Yes
	Sheepshead Minnow	Vertebrate	1.8	>100	100	0.3[2]	Yes
Outfall 002	Opossum Shrimp	Invertebrate	1.8	>100	95	<1.0	Yes
	Sheepshead Minnow	Vertebrate	1.8	>100	95	<1.0	Yes

1. TUa = (100)/(48 hr LC50) or (100)/(48 hr EC50)

2. TUa is reported as 0.3 if there is no statistically significant toxicity in 100% effluent as compared to control, as per SPDES permit.

Sincerely,

Frank Messina
Project Manager

OUTFALL #:		001
EFFLUENT TYPE:		Final
TEST TYPE:		Static daily-renewal
TEST DURATION:		48 hrs
TEST ORGANISM:	*Cyprinodon variegatus* (scientific name)	sheepshead minnow (common name)
TEST ENDPOINT:		LC_{50}
TEST ORGANISM AGE:		11 days

SUMMARY OF FINAL RESULTS:

INITIATION DATE:	06/17/20	COMPLETION DATE:	06/19/20
INITIATION TIME:	12:30 pm	COMPLETION TIME:	11:30 pm

48 hour LC_{50} /EC_{50} (% effluent):	>100%
Survival in 100 % effluent:	100%

QUALITY CONTROL SUMMARY

Control survival (%):	100%
Temperature maintained +/- 1 °C?	Yes
Dissolved oxygen ≥ minimum?	Yes
Loading factor ≤ maximum?	Yes
Two or more conc. w/trend deviation?	No

CERTIFICATION:

E&PS

October 27, 2020

New York State Department of Environmental Conservation
Toxicity Testing Unit
Bureau of Watershed Assessment and Management
625 Broadway, Fourth Floor
Albany, New York 12233-7013

Attention: Ms. Nicole Wright

Re: Acute Whole Effluent Toxicity Testing Report – September 2020
SPDES Permit No. NY-0267724
ExxonMobil Greenpoint Petroleum Remediation Project
Greenpoint, Brooklyn, New York

Dear Ms. Wright:

ExxonMobil Oil Corporation is submitting this Acute Whole Effluent Toxicity (WET) Testing Report for the On-Site Free-Product Recovery System (RCS) and the Off-Site Free-Product Recovery System (ORS) for the Third Quarter of 2020, in accordance with the requirements of the New York State Department of Environmental Conservation (NYSDEC) State Pollution Discharge Elimination System (SPDES) Permit, No. NY-0267724, issued by the NYSDEC, effective April 1, 2015. The SPDES permit (NY 0267724) issued on April 1, 2015 expired on March 31, 2020. A renewal application was submitted to the NYSDEC on September 30, 2019. ExxonMobil received notification from the NYSDEC on October 4, 2019, indicating that the request for renewal was timely and sufficient and is pending review and, until that time, the current permit is to remain in effect, in accordance with the State Administrative Procedures Act. All results indicate no exceedances, as described below.

American Aquatic Testing, Inc., on behalf of Alpha Analytical, performed two static-renewal acute toxicity tests for the Outfalls 001 and 002 by exposing mysid (i.e., *Mysidopsis bahia*) and sheepshead minnow (i.e., *Cyprinodon variegatus*) to the samples for forty-eight hours in a static-renewal test system. All results indicate no exceedances of the respective SPDES Permit action levels, as shown in the laboratory analytical results attached hereto.

The Outfall 001 discharge was sampled on September 15, 2020, for the purpose of performing acute WET testing, operating at a flow rate of approximately 306 gpm, or 0.44 MGD. The Outfall 001 discharge was sampled again on September 16, 2020, for the purpose of renewing the acute toxicity test sample, operating at a flow rate of approximately 388 gpm, or 0.56 MGD. The Outfall 001 discharge sample results indicate no exceedances of toxicity action levels specified in the SPDES Permit for Outfall 001. As shown in the attached laboratory analytical results and below table, there was no statistically-significant toxicity in 100% effluent compared to the control, so the toxicity unit-acute (TUa) was determined to be 0.3 for both the opossum shrimp and the sheepshead minnow test, in accordance with the WET Testing evaluation procedure described in the attached laboratory results.

The Outfall 002 discharge was sampled on September 15, 2020, for the purpose of performing acute WET testing, operating at a flow rate of approximately 340 gpm, or 0.49 MGD. The Outfall 002 discharge was sampled again on September 16, 2020, for the purpose of renewing the acute toxicity test sample, operating at a flow rate of approximately 291 gpm, or 0.42 MGD. The Outfall 002 discharge sample results indicate no exceedances of toxicity action levels specified in the SPDES Permit for Outfall 002. As shown in the attached laboratory analytical results and below table, there was no statistically-significant toxicity in 100% effluent compared to the control, so the TUa was determined to be 0.3 for both the opossum shrimp and the sheepshead minnow tests, in accordance with the WET Testing evaluation procedure described in the SPDES Permit.

Should there be any questions or comments on this submission, please do not hesitate to contact me at 718-404-0652.

Discharge Location	Species	Analysis Type	Action Level (TUa)	48-Hr LC_{50} (% Effluent)	Survival in 100% Effluent (%)	Calculated TUa[1]	In Compliance
Outfall 001	Opossum Shrimp	Invertebrate	1.8	>100	100	0.3[2]	Yes
	Sheepshead Minnow	Vertebrate	1.8	>100	100	0.3[2]	Yes
Outfall 002	Opossum Shrimp	Invertebrate	1.8	>100	100	0.3[2]	Yes
	Sheepshead Minnow	Vertebrate	1.8	>100	100	0.3[2]	Yes

1. TUa = (100)/(48 hr LC50) or (100)/(48 hr EC50)

2. TUa is reported as 0.3 if there is no statistically significant toxicity in 100% effluent as compared to control, as per SPDES permit.

Sincerely,

Frank Messina
Project Manager

Attention: Ms. Nicole Wright

Re: Acute Whole Effluent Toxicity Testing Report – November 2020
SPDES Permit No. NY-0267724
ExxonMobil Greenpoint Petroleum Remediation Project
Greenpoint, Brooklyn, New York

Dear Ms. Wright:

ExxonMobil Oil Corporation is submitting this Acute Whole Effluent Toxicity (WET) Testing Report for the On-Site Free-Product Recovery System (RCS) and the Off-Site Free-Product Recovery System (ORS) for the Fourth Quarter of 2020, in accordance with the requirements of the New York State Department of Environmental Conservation (NYSDEC) State Pollution Discharge Elimination System (SPDES) Permit, No. NY-0267724, issued by the NYSDEC, effective April 1, 2015. The SPDES permit (NY 0267724) issued on April 1, 2015 expired on March 31, 2020. A renewal application was submitted to the NYSDEC on September 30, 2019. ExxonMobil received notification from the NYSDEC on October 4, 2019, indicating that the request for renewal was timely and sufficient and is pending review and, until that time, the permit issued April 1, 2015 is to remain in effect, in accordance with the State Administrative Procedures Act. All results indicate no exceedances, as described below.

American Aquatic Testing, Inc., on behalf of Alpha Analytical, performed two static-renewal acute toxicity tests for the Outfalls 001 and 002 by exposing mysid (i.e., *Mysidopsis bahia*) and sheepshead minnow (i.e., *Cyprinodon variegatus*) to the samples for forty-eight hours in a static-renewal test system. All results indicate no exceedances of the respective SPDES Permit action levels, as shown in the laboratory analytical results attached hereto.

The Outfall 001 discharge was sampled on November 17, 2020, for the purpose of performing acute WET testing, operating at a flow rate of approximately 432 gpm, or 0.62 MGD. The Outfall 001 discharge was sampled again on November 18, 2020, for the purpose of renewing the acute toxicity test sample, operating at a flow rate of approximately 358 gpm, or 0.52 MGD. The Outfall 001 discharge sample results indicate no exceedances of toxicity action levels specified in the SPDES Permit for Outfall 001. As shown in the attached laboratory analytical results and below table, there was a 95% survival in 100% effluent compared to the control, so the TUa was determined to be <1.0 for the opossum shrimp tests in accordance with the WET Testing evaluation procedure described in the SPDES Permit. There was no statistically-significant toxicity in 100% effluent compared to the control, so the toxicity unit-acute (TUa) was determined to be 0.3 for the sheepshead minnow test, in accordance with the WET Testing evaluation procedure described in the SPDES Permit.

The Outfall 002 discharge was sampled on November 17, 2020, for the purpose of performing acute WET testing, operating at a flow rate of approximately 312 gpm, or 0.45 MGD. The Outfall 002 discharge was sampled again on November 18, 2020, for the purpose of renewing the acute toxicity test sample, operating at a flow rate of approximately 310 gpm, or 0.45 MGD. The Outfall 002 discharge sample results indicate no exceedances of toxicity action levels specified in the SPDES Permit for Outfall 002. As shown in the attached laboratory analytical results and below table, there was a 95% survival in 100% effluent compared to the

control, so the TUa was determined to be <1.0 for the opossum shrimp tests in accordance with the WET Testing evaluation procedure described in the SPDES Permit. There was no statistically-significant toxicity in 100% effluent compared to the control, so the TUa was determined to be 0.3 for the sheepshead minnow tests, in accordance with the WET Testing evaluation procedure described in the SPDES Permit.

Should there be any questions or comments on this submission, please do not hesitate to contact me at 718-404-0652.

Discharge Location	Species	Analysis Type	Action Level (TUa)	48-Hr LC_{50} (% Effluent)	Survival in 100% Effluent (%)	Calculated TUa[1]	In Compliance
Outfall 001	Opossum Shrimp	Invertebrate	1.8	>100	95	<1.0	Yes
	Sheepshead Minnow	Vertebrate	1.8	>100	100	0.3[2]	Yes
Outfall 002	Opossum Shrimp	Invertebrate	1.8	>100	95	<1.0	Yes
	Sheepshead Minnow	Vertebrate	1.8	>100	100	0.3[2]	Yes

1. TUa = (100)/(48 hr LC50) or (100)/(48 hr EC50)
2. TUa is reported as 0.3 if there is no statistically significant toxicity in 100% effluent as compared to control, as per SPDES permit.

Sincerely,

Frank Messina
Project Manager

(rev. 5-JAN-12)

NYSPDES BIOMONITORING REPORT FORM: SALTWATER ACUTE TOXICITY

Permit#:	NY 0267724
Facility Name:	ExxonMobil Oil Corporation Greenpoint Remediation Project
Reporting Location:	400 Kingsland Avenue Brooklyn, NY 11222
Contact Person:	Frank Messina
Phone Number:	(716) 404-0652
Laboratory:	American Aquatic Testing, Inc.

BIOASSAY INFORMATION:

OUTFALL #:		001
EFFLUENT TYPE:		Final
TEST TYPE:		Static daily-renewal
TEST DURATION:		48 hrs
TEST ORGANISM:	*Mysidopsis bahia* (scientific name)	opossum shrimp (common name)
TEST ENDPOINT:		LC_{50}
TEST ORGANISM AGE:		1 day

SUMMARY OF FINAL RESULTS:

INITIATION DATE:	11/18/20	COMPLETION DATE:	11/18/20
INITIATION TIME:	6:05 pm	COMPLETION TIME:	5:05 pm

48 hour LC_{50} /EC_{50} (% effluent):	>100%
Survival in 100 % effluent:	95%

QUALITY CONTROL SUMMARY

Control survival (%):	100%
Temperature maintained +/- 1 °C?	Yes
Dissolved oxygen ≥ minimum?	Yes
Loading factor ≤ maximum?	Yes
Two or more conc. w/trend deviation?	No

CERTIFICATION:

Form NY-2C PART I SPDES

NEW YORK STATE OF OPPORTUNITY | Department of Environmental Conservation

New York State Department of Environmental Conservation
Application for SPDES Permit to Discharge Wastewater
GENERAL INFORMATION

SECTION 1. PERMIT ACTION REQUESTED

Permit Action Requested

1.1 What is the reason for submitting this application?

- ☐ A NEW proposed Discharge
- ☐ A RENEWAL of an existing permit
- ☐ An EXISTING discharge currently without permit
- ☐ An EBPS REQUEST FOR INFORMATION response
- ☑ A MODIFICATION of the existing permit (describe below)

Relocation/consolidation of existing treatment facility

1.2 Increased Discharge Request

Is this application a request for an increase in the quantity of water discharged from your facility to the waters of the State?

- ☐ Yes ➔ Describe the increase:
- ☑ No ➔ Skip to Item 2.1

SECTION 2. PERMITTEE & FACILITY NAME, LEGAL STATUS, MAILING ADDRESS, AND LOCATION (40 CFR 122.21(f)(2))

Permittee & Facility Name, Legal Status, Mailing Address, and Location

2.1 Permittee Name

ExxonMobil Oil Corporation. Att. Michael Burghardt

2.2 Permittee Mailing Address

Street or P.O. box
38 Varick Street

City or town	State	ZIP code
Brooklyn	NY	11222

2.3 Permitee Legal Status

- ☐ Public—federal
- ☐ Public—state
- ☐ Other public (specify)_____
- ☑ Private
- ☐ Other (specify) _____

2.4 Facility Name

ExxonMobil Greenpoint Petroleum Remediation Project

2.5 NYSDEC Identification Number

2-6101-00107-0026

2.6 Facility Contact

Name (first and last)	Title	Phone number
Courtney Lind	Senior Engineer	(631) 232-2600

Email address
clind@rouxinc.com

2.7 Facility Location

Street, route number, or other specific identifier
38 Varick Street

County name	County code (if known)	
Kings		

City or town	State	ZIP code
Brooklyn	NY	11222

SECTION 3. SIC AND NAICS CODES (40 CFR 122.21(f)(3))

SIC and NAICS Codes

3.1	SIC Code(s)	Description (optional)
	4959	Groundwater Treatment

3.2	NAICS Code(s)	Description (optional)
	562910	Remediation and cleanup of soil, and/or ground water

SECTION 4. OPERATOR INFORMATION (40 CFR 122.21(f)(4))

Operator Information

4.1 **Name of Operator**

Justin Kennedy, P.E.

4.2 Is the name you listed in Item 4.1 also the owner?

☐ Yes ➔ Skip to Item 5.1 ☑ No

4.3 **Operator Status**

☐ Public—federal ☐ Public—state ☐ Other public (specify)_____

☑ Private ☐ Other (specify) _____

4.4 **Phone Number of Operator**

(631) 232-2600

Operator Information Continued

4.5 **Operator Address**

Street or P.O. Box
38 Varick Street

City or town	State	ZIP code
Brooklyn	NY	11222

Email address of operator
jkennedy@rouxinc.com

SECTION 5. INDIAN LAND (40 CFR 122.21(f)(5))

Indian Land

5.1 Is the facility located on Indian Land?

☐ Yes ☑ No

SECTION 6. EXISTING ENVIRONMENTAL PERMITS (40 CFR 122.21(f)(6))

Existing Environmental Permits

6.1 **Existing Environmental Permits** (check all that apply and print or type the corresponding permit number for each)

☑ SPDES	☐ RCRA (hazardous wastes)	☐ UIC (underground injection)
☐ PSD (air emissions)	☐ Nonattainment program (CAA)	☐ NESHAPs (CAA)
☐ Ocean dumping (MPRSA)	☐ Dredge or fill (CWA Section 404)	☑ Other (specify) See Attachment 1a

SECTION 7. MAP (40 CFR 122.21(f)(7))

Map

7.1 Have you attached a topographic map containing all required information to this application? (See instructions for specific requirements.)

☑ Yes ☐ No

SECTION 8. NATURE OF BUSINESS (40 CFR 122.21(f)(8))

Nature of Business

8.1 Describe the nature of your business.

The Greenpoint Remediation project operates under the oversight of the NYSDEC, and in accordance with the requirements of the Consent Decree between the State of New York and ExxonMobil, filed on March 1, 2011, in the United States District Court, Eastern District of New York (Consent Decree). The remediation system provides petroleum hydrocarbon (free-product) recovery and groundwater treatment for a subsurface petroleum accumulation. Petroleum free-product will continue to be recovered via operation of dual-pump liquid extraction (DPLE) recovery wells. and then conveyed to an operating groundwater treatment facility for treatment. Following treatment, the groundwater will be conveyed to the discharge Outfall within Newtown Creek, Outfall 002.

SECTION 9. WATER SUPPLY & COOLING WATER INTAKE STRUCTURES (40 CFR 122.21(f)(9))

Water Supply Source(s)

9.1 What water supply source(s) does your facility use? Identify the name or owner of each source. (check all that apply)

☐ Municipal ☐ Private Intake ☐ Private Well ☑ Other (specify)

Owner: _____ _____ _____ ExxonMobil Recovery wells

9.2 Provide the amount of water typically consumed from each of these sources.

Municipal	MGD	Private Well		MGD
Private Intake	MGD	Other	750.00	MGD

9.3 Is the facility located within a sole source aquifer as shown on Exhibit 2C-6?

☑ Yes ➔Complete Application Supplement B (see SPDES website) ☐ No

Cooling Water Intake Structures

9.4 Does your facility use any of these water sources for cooling water?

☐ Yes ☑ No ➔SKIP to Item 10.1.

9.5 Identify the sources used for cooling water. (Note that facilities that use a cooling water intake structure as described at 40 CFR 125, Subparts I and J and NYSDEC Commisioner's Policy 52 (CP-52) may have additional application requirements. Consult with NYSDEC to determine if additional information is needed.)

Thermal Discharges

9.6 If your industry group is listed (see instructions), or the temperature of your discharge exceeds the receiving water temperature by greater than 3°F, provide the following data in (°F):

Avg. Temp. Max Temp. Avg. Delta T Max Delta T

SECTION 10. VARIANCE REQUESTS (40 CFR 122.21(f)(10))

Variance Requests

10.1 Do you intend to request or renew one or more variances pursuant to 6 NYCRR 702.17 or authorized at 40 CFR 122.21(m)? (Check all that apply). Consult with NYSDEC to determine what information is needed.

☐ Fundamentally different factors (CWA Section 301(n))

☐ Water quality related effluent limitations (CWA Section 302(b)(2))

☐ Non-conventional pollutants (CWA Section 301(c) and (g))

☐ Thermal discharges (CWA Section 316(a))

☐ NYS WQBEL (6 NYCRR 702.17)

☑ Not applicable

SECTION 11. CHECKLIST AND CERTIFICATION STATEMENT (40 CFR 122.22(a) and (d))

Part I Checklist

11.1 In Column 1 below, mark the sections of Form NY-2C Part I that you have completed and are submitting with your application. For each section, specify in Column 2 any attachments that you are enclosing to alert NYSDEC. Note that not all applicants are required to provide attachments.

Column 1	Column 2
☑ Section 1: Permit Action Requested	☐ w/ attachments
☑ Section 2: Name, Mailing Address, and Location	☐ w/ attachments
☑ Section 3: SIC Codes	☐ w/ attachments
☑ Section 4: Operator Information	☐ w/ attachments
☑ Section 5: Indian Land	☐ w/ attachments
☑ Section 6: Existing Environmental Permits	☑ w/ attachments
☑ Section 7: Map	☑ w/ topographic map ☐ w/ additional attachments
☑ Section 8: Nature of Business	☐ w/ attachments
☑ Section 9: Water Supply & CWIS	☐ w/ attachments ☑ w/ Sole Source Aquifer Supplement
☑ Section 10: Variance Requests	☐ w/ attachments
☑ Section 11: Checklist	☐ w/ attachments

PART II of Form NY-2C begins on the next page.

Form NY-2C PART II SPDES

NEW YORK STATE OF OPPORTUNITY | Department of Environmental Conservation

New York State Department of Environmental Conservation Application for SPDES Permit to Discharge Wastewater

NEW AND EXISTING INDUSTRIAL OPERATIONS DETAILED INFORMATION

SECTION 1. OUTFALL LOCATION (40 CFR 122.21(g)(1)) & RECEIVING WATER DESCRIPTION (6 NYCRR 750-1.7(a))

Outfall Location & Receiving Water Description

1.1 Provide information on each of the facility's outfalls and the receiving waters in the table below.

	Outfall _____	Outfall _____	Outfall _____
Latitude	40 ° 43 ′ 41.1″ N	° ′ ″	° ′ ″
Longitude	73 ° 55 ′ 56.1″ W	° ′ ″	° ′ ″
Receiving Water Name	Newtown Creek		
Water Index Number (WIN)	(MW2.1) ER-LI- 4		
Waterbody Inventory/ Priority Waterbodies List (WI/PWL) Segment	1702-0002		
Water Classification	SD		
Groundwater Discharges Only:			
Soil Type			
Depth to Water Table	ft	ft	ft

SECTION 2. LINE DRAWING (40 CFR 122.21(g)(2))

Line Drawing

2.1 Have you attached a line drawing to this application that shows the water flow through your facility with a water balance? (See instructions for drawing requirements. See Exhibit 2C–3 at end of instructions for example.)

☑ Yes ☐ No

SECTION 3. AVERAGE FLOWS AND TREATMENT (40 CFR 122.21(g)(3))

Average Flows and Treatment

3.1 For each outfall identified under Item 1.1, provide average flow and treatment information. Add additional sheets if necessary.

****Outfall Number**** 002

Operations Contributing to Flow

Operation	Average Flow	Maximum Flow
Remediation System Discharge	1.08 MGD	1.30 MGD
	MGD	MGD
	MGD	MGD
	MGD	MGD

Treatment Units

Description (include size, flow rate through each treatment unit, retention time, etc.)	Code from Table 2C-1	Final Disposal of Solid or Liquid Wastes Other Than by Discharge
See Supplemental information following application		

Average Flows and Treatment Continued

3.1 cont.

****Outfall Number**** _____

Operations Contributing to Flow

Operation	Average Flow	Maximum Flow
	MGD	MGD
	MGD	MGD
	MGD	MGD
	MGD	MGD

Treatment Units

Description (include size, flow rate through each treatment unit, retention time, etc.)	Code from Table 2C-1	Final Disposal of Solid or Liquid Wastes Other Than by Discharge

WTCs

3.2 Does the facility utilize or plan to utilize any water treatment chemicals that can potentially be discharged from one or more outfalls?

☑ Yes ➔ Complete Table F ☐ No ➔ SKIP to Item 3.3.

Mixing Zone Form

3.3 Has a Mixing Zone Analysis Form been completed and attached? All applicants must complete at least the Simple Form for each wastewater outfall to surface waters. Indicate which form was completed and is attached to this application.

☐ Yes ➔ Simple Form ☑ Yes ➔ Detailed Form

DEC Identification Number	SPDES Permit Number	Facility Name	Form Approved: 5/12/2023
2-6101-00107-0026	NY 0267724	ExxonMobil Greenpoint	

SECTION 4. INTERMITTENT FLOWS (40 CFR 122.21(g)(4))

Intermittent Flows

4.1 Except for storm runoff, leaks, or spills, are any discharges described in Sections 1 and 3 intermittent or seasonal?

☐ Yes ☑ No ➔ SKIP to Section 5.

4.2 Provide information on intermittent or seasonal flows for each applicable outfall. Attach additional pages, if necessary.

Outfall Number	Operation (list)	Frequency		Flow Rate		Duration
		Average Days/Week	Average Months/Year	Long-Term Average	Maximum Daily	
		days/week	months/year	MGD	MGD	days
		days/week	months/year	MGD	MGD	days
		days/week	months/year	MGD	MGD	days
		days/week	months/year	MGD	MGD	days
		days/week	months/year	MGD	MGD	days

		days/week	months/year	MGD	MGD	days
		days/week	months/year	MGD	MGD	days
		days/week	months/year	MGD	MGD	days

SECTION 5. PRODUCTION (40 CFR 122.21(g)(5))

Applicable ELGs

5.1 Do any effluent limitation guidelines (ELGs) promulgated by EPA under Section 304 of the CWA apply to your facility?

☐ Yes ☑ No ➔ SKIP to Item 5.5.

5.2 Provide the following information on applicable ELGs.

ELG Category	ELG Subcategory	Regulatory Citation

Production-Based Limitations

5.3 Are any of the applicable ELGs expressed in terms of production (or other measure of operation)?

☐ Yes ☐ No ➔ SKIP to Item 5.5.

5.4 Provide an actual measure of daily production expressed in terms and units of applicable ELGs.

Outfall Number	Operation, Product, or Material	Quantity per Day	Unit of Measure

Specific Industry

5.5 Is your industry type listed as a specific industry requiring submission of a supplemental application form (see instructions)?

☐ Yes, supplemental form attached ☑ No ➔ SKIP to Section 6.

SECTION 6. SCHEDULED IMPROVEMENTS (40 CFR 122.21(g)(6))

Upgrades and Improvements

6.1 Are you presently voluntarily improving or required by any federal, state, or local authority to meet an implementation schedule for constructing, upgrading, or operating wastewater treatment equipment or practices or any other environmental programs that could affect the discharges described in this application?

☐ Yes ☑ No ➔ SKIP to Item 6.3.

6.2 Briefly identify each applicable project in the table below.

Brief Identification and Description of Project	Affected Outfalls (list outfall number)	Source(s) of Discharge	Final Compliance Dates	
			Required	Projected

6.3 Have you attached sheets describing any additional water pollution control programs (or other environmental projects that may affect your discharges) that you now have underway or planned? *(optional item)*

☐ Yes ☑ No ☐ Not applicable

SECTION 7. EFFLUENT AND INTAKE CHARACTERISTICS (40 CFR 122.21(g)(7))

Effluent and Intake Characteristics

See the instructions to determine the pollutants and parameters you are required to monitor and, in turn, the tables you must complete. Not all applicants need to complete each table.

Table A. Conventional and Non-Conventional Pollutants

7.1 Are you requesting a waiver from NYSDEC for one or more of the Table A pollutants for any of your outfalls?

☐ Yes ☑ No ➔ SKIP to Item 7.3.

7.2 If yes, indicate the applicable outfalls below. Attach waiver request and other required information to the application.

Outfall Number _____ Outfall Number _____ Outfall Number _____

7.3 Have you completed monitoring for all Table A pollutants at each of your outfalls for which a waiver has not been requested and attached the results to this application package?

☑ Yes ☐ No;a waiver request has been attached for all pollutants at all outfalls.

Table B. Toxic Metals, Cyanide, Total Phenols, and Organic Toxic Pollutants

7.4 Do any of the facility's processes that contribute wastewater fall into one or more of the primary industry categories listed in Exhibit 2C-5?

☐ Yes ☑ No ➔SKIP to Item 7.8.

7.5 Have you checked "Testing Required" for all toxic metals, cyanide, and total phenols in Section 1 of Table B?

☐ Yes ☐ No

7.6 List the applicable primary industry categories and check the boxes indicating the required GC/MS fraction(s) identified in Exhibit 2C-5.

Primary Industry Category	Required GC/MS Fraction(s) (Check applicable boxes.)			
	☐ Volatile	☐ Acid	☐ Base/Neutral	☐ Pesticide
	☐ Volatile	☐ Acid	☐ Base/Neutral	☐ Pesticide
	☐ Volatile	☐ Acid	☐ Base/Neutral	☐ Pesticide

Effluent and Intake Characteristics Continued

7.7	Have you checked "Testing Required" for all required pollutants in Sections 2 through 5 of Table B for each of the GC/MS fractions checked in Item 7.6? ☐ Yes ☐ No
7.8	Have you checked "Believed Present" or "Believed Absent" for all pollutants listed in Sections 1 through 5 of Table B where testing is not required? ☑ Yes ☐ No
7.9	Have you provided (1) quantitative data for those Section 1, Table B, pollutants for which you have indicated testing is required or (2) quantitative data or other required information for those Section 1, Table B, pollutants that you have indicated are "Believed Present" in your discharge? ☑ Yes ☐ No
7.10	Have you provided (1) quantitative data for those Sections 2 through 5, Table B, pollutants for which you have determined testing is required or (2) quantitative data or an explanation for those Sections 2 through 5, Table B, pollutants you have indicated are "Believed Present" in your discharge? ☑ Yes ☐ No
Table C. Certain Conventional and Non-Conventional Pollutants	
7.11	Have you indicated whether pollutants are "Believed Present" or "Believed Absent" for all pollutants listed on Table C for all outfalls? ☑ Yes ☐ No
7.12	Have you completed Table C by providing (1) quantitative data for those pollutants that are limited either directly or indirectly in an ELG and/or (2) quantitative data or an explanation for those pollutants for which you have indicated "Believed Present"? ☑ Yes ☐ No
Table D. Certain Hazardous Substances and Asbestos	
7.13	Have you indicated whether pollutants are "Believed Present" or "Believed Absent" for all pollutants listed in Table D for all outfalls? ☑ Yes ☐ No
7.14	Have you completed Table D by (1) describing the reasons the applicable pollutants are expected to be discharged and (2) by providing quantitative data, if available? ☑ Yes ☐ No
Table E. 2,3,7,8-Tetrachlorodibenzo-p-Dioxin (2,3,7,8-TCDD)	
7.15	Does the facility use or manufacture one or more of the 2,3,7,8-TCDD congeners listed in the instructions, or do you know or have reason to believe that TCDD is or may be present in the effluent? ☐ Yes ➔ Complete Table E. ☑ No ➔ SKIP to Section 8.
7.16	Have you completed Table E by reporting *qualitative* data for TCDD? ☐ Yes ☑ No

SECTION 8. USED OR MANUFACTURED TOXICS (40 CFR 122.21(g)(9))

Used or Manufactured Toxics

8.1	Are any other pollutants, substances, or components of substances, not already listed in Tables A-E, used or manufactured at your facility as an intermediate or final product or byproduct? ☐ Yes ☑ No ➔ SKIP to Section 9.		
8.2	List the pollutants below.		
	1.	4.	7.
	2.	5.	8.
	3.	6.	9.

SECTION 9. BIOLOGICAL TOXICITY TESTS (40 CFR 122.21(g)(11))

Biological Toxicity Tests

9.1 Do you have any knowledge or reason to believe that any biological test for acute or chronic toxicity has been made within the last three years on (1) any of your discharges or (2) on a receiving water in relation to your discharge?

☑ Yes ☐ No ➔ SKIP to Section 10.

9.2 Identify the tests and their purposes below.

Test(s)	Purpose of Test(s)	Submitted to NYSDEC?	Date Submitted
Acute Whole Effluent Toxicity (WET) Testing	5 Year SPDES Testing requirements	☑ Yes ☐ No	12/28/2020
		☐ Yes ☐ No	
		☐ Yes ☐ No	

SECTION 10. CONTRACT ANALYSES (40 CFR 122.21(g)(12))

Contract Analyses

10.1 Were any of the analyses reported in Section 7 performed by a contract laboratory or consulting firm?

☑ Yes ☐ No ➔ SKIP to Section 11.

10.2 Provide information for each contract laboratory or consulting firm below.

	Laboratory Number 1	Laboratory Number 2	Laboratory Number 3
Name of laboratory/firm	Eurofins Lancaster Laboratories, Inc.		
ELAP Cert No.	10670		
Laboratory address	2425 New Holland Pike Lancaster, PA 17601		
Phone number	(717) 656-2300		
Pollutant(s) analyzed	VOCs, SVOCs, Metals, General Chemisty, Wet Chemistry		

SECTION 11. ADDITIONAL INFORMATION (40 CFR 122.21(g)(13))

Additional Information

11.1 Does your facility use, produce, store, distribute, or otherwise dispose of any significant quantity of substances listed in Tables B, C, D, E or those substances identified in Item 8.2?

☐ Yes ➔ Complete Table G. ☑ No ➔ SKIP to Item 11.2.

11.2 Does your facility utilize pumping stations to convey wastewaters on the site and/or in wastewater treatment?

☐ Yes ➔ Complete Table H. ☑ No ➔ SKIP to Item 11.3.

11.3 Has NYSDEC requested additional information?

☐ Yes ☑ No ➔ SKIP to Section 12.

11.4 List the information requested and attach it to this application.

1.	3.
2.	4.

SECTION 12. CHECKLIST AND CERTIFICATION STATEMENT (40 CFR 122.22(a) and (d))

Checklist and Certification Statement

12.1 In Column 1 below, mark the sections of Form NY-2C that you have completed and are submitting with your application. For each section, specify in Column 2 any attachments that you are enclosing to alert NYSDEC. Note that not all applicants are required to complete all sections or provide attachments.

Column 1	Column 2
☑ Section 1: Outfall Location	☐ w/ attachments
☑ Section 2: Line Drawing	☑ w/ line drawing ☐ w/ additional attachments
☑ Section 3: Average Flows and Treatment	☐ w/ attachments ☐ w/ Simple MZ Form ☑ w/ Table F ☑ w/ Detailed MZ Form
☑ Section 4: Intermittent Flows	☐ w/ attachments
☑ Section 5: Production	☐ w/ attachments
☑ Section 6: Improvements	☐ w/ attachments ☐ w/ optional additional sheets describing any additional pollution control plans
☑ Section 7: Effluent and Intake Characteristics	☐ w/ request for a waiver and supporting information ☐ w/ explanation for identical outfalls ☐ w/ primary industry supplemental form ☐ w/ additional attachments ☑ w/ Table A ☑ w/ Table B ☑ w/ Table C ☑ w/ Table D ☑ w/ Table E ☑ w/ analytical results as an attachment
☑ Section 8: Used or Manufactured Toxics	☐ w/ attachments
☑ Section 9: Biological Toxicity Tests	☐ w/ attachments
☑ Section 10: Contract Analyses	☐ w/ attachments
☑ Section 11: Additional Information	☐ w/ attachments ☐ w/ Table G ☐ w/ Table H
☑ Section 12: Checklist and Certification Statement	☐ w/ attachments

12.2 **Certification Statement**

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Name (print or type first and last name)	Official title
Michael Burghardt	US East Supervisor
Signature 	**Date signed** February 16, 2024

DEC Identification Number	SPDES Permit Number	Facility Name	Outfall Number
2-6101-00107-0026	NY 0267724	ExxonMobil Greenpoint Petroleum Remediation Project	Outfall 01A

TABLE A. CONVENTIONAL AND NON CONVENTIONAL POLLUTANTS (40 CFR 122.21(g)(7)(iii)) 1

	Pollutant	Waiver Requested (input "Yes" when applicable)	Units (specify)		Effluent: Maximum Daily Discharge (required)	Effluent: Maximum Monthly Discharge (if available)	Effluent: Long-Term Average Daily Discharge (if available)	Effluent: Number of Analyses	Intake (Optional): Long-Term Average Value	Intake (Optional): Number of Analyses
	Mark "X" in Cell A6 if you have attached a request to NYSDEC for a waiver for *all* of the pollutants listed on this table for the noted outfall.									
4										
1.	Biochemical oxygen demand (BOD5)		Concentration	µg/L	2000 U			4	1,500	4
			Mass	g	< 4088			4	3,066	4
2.	Chemical oxygen demand (COD)		Concentration	µg/L	58000 J			4	44,075	4
			Mass	g	118,546			4	90,085	4
3.	Total organic carbon (TOC)		Concentration	µg/L	6800			4	6,300	1
			Mass	g	13,899			4	12,877	1
4.	Total suspended solids (TSS)		Concentration	µg/L	2300 J			4	8,625	4
			Mass	g	4,701			4	17,629	4
5.	Ammonia (as N)		Concentration	µg/L						
			Mass	g						
6.	Flow		Rate	GPM	404			4	387	4
7.	Temperature (winter)		°C	°C	16.30			4	16.97	4
	Temperature (summer)		°C	°C	20.68			4	18.56	4
8.	pH (minimum)		Standard units	SU	7.39			4	6.95	4
	pH (maximum)		Standard units	SU	8.43			4	7.42	4
9.	Mercury[2]		Concentration	µg/L	0.00072			3		
			Mass	g	0.00147			3		

1 Sampling shall be conducted according to sufficiently sensitive test procedures (i.e., methods) approved under 40 CFR 136 for the analysis of pollutants or pollutant parameters or required under 40 CFR chapter I, subchapter N or O. See instructions and 40 CFR 122.21(e)(3).

2 Analysis for Mercury must be performed utilizing the low-level, USEPA Method 1631

Additional Notes:

Temperature and pH were measured at the time of sampling and during lab analysis. Values are representative of field data.

U Compound was analyzed for but not detected. The value shown with the "U" qualifier is the laboratory Reporting Limit.

J Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.

For analytes with both detections and non-detection results, the maximum daily discharge was calculated using the maximum of the detection values.

For analytes with both detections and non-detection results, the intake average was calculated using the average of the detection values and, for non-detections, half of the Reporting Limit.

DEC Identification Number	SPDES Permit Number	Facility Name	Outfall Number
2-6101-00107-0026	NY 0267724	ExxonMobil Greenpoint Petroleum	01A

TABLE A. CONVENTIONAL AND NON CONVENTIONAL POLLUTANTS (40 CFR 122.21(g)(7)(iii)) 1

36.	7:3 FTCA		Concentration	ng/L	480 U			3		
37.	NFDHA		Concentration	ng/L	38 U			3		
38.	PFMBA		Concentration	ng/L	3.9 U			3		
39.	PFMPA		Concentration	ng/L	3.9 U			3		
40.	PFEESA		Concentration	ng/L	38 U			3		
Section 3.[4]										
1.	1,4-Dioxane		Concentration	µg/L	0.45			3		

3. Analysis for the PFAS suite of compounds must be performed utilizing USEPA's draft analytical Method 1633.

4. Analysis for 1,4-Dioxane must be performed utilizing USEPA Method 8270E SIM or 8270D SIM.

Additional Notes:

- U Compound was analyzed for but not detected. The value shown with the "U" qualifier is the laboratory Reporting Limit.
- J Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.
- I Compound did not meet the ion ratio criteria.

For analytes with both detections and non-detection results, the maximum daily discharge was calculated using the maximum of the detection values.

DEC Identification Number	SPDES Permit Number	Facility Name	Outfall Number

1 Sampling shall be conducted according to sufficiently sensitive test procedures (i.e., methods) approved under 40 CFR 136 for the analysis of pollutants or pollutant parameters or required under 40 CFR chapter I, subchapter N or O. See instructions and 40 CFR 122.21(e)(3).

2 Analysis for Total Recoverable Mercury must be performed utilizing the low-level, USEPA Method 1631E.

Additional Notes:

U Compound was analyzed for but not detected. The value shown with the "U" qualifier is the laboratory Reporting Limit.

J Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.

T Indicates that a quality control parameter has exceeded laboratory limits.

For analytes with both detections and non-detection results, the maximum daily discharge was calculated using the maximum of the detection values.

For analytes with both detections and non-detection results, the intake average was calculated using the average of the detection values and, for non-detections, half of the Reporting Limit.

1 Sampling shall be conducted according to sufficiently sensitive test procedures (i.e., methods) approved under 40 CFR 136 for the analysis of pollutants or pollutant parameters or required under 40 CFR chapter I, subchapter N or O. See instructions and 40 CFR 122.21(e)(3).

2 Analysis for Total Recoverable Mercury must be performed utilizing the low-level, USEPA Method 1631E.

Additional Notes:

U Compound was analyzed for but not detected. The value shown with the "U" qualifier is the laboratory Reporting Limit.

J Result is less than the Reporting Limit but greater than or equal to the Method Detection Limit and the concentration is an approximate value.

T Indicates that a quality control parameter has exceeded laboratory limits.

For analytes with both detections and non-detection results, the maximum daily discharge was calculated using the maximum of the detection values.

For analytes with both detections and non-detection results, the intake average was calculated using the average of the detection values and, for non-detections, half of the Reporting Limit.

TABLE G. INDUSTRIAL CHEMICAL SURVEY

Complete this table for all substances that have been used, produced, stored, distributed or otherwise disposed of in significant quantity AND for any quantity of BCCs, chemicals for which FDA fish flesh limits exist, or restricted pesticide products listed in Part 326, Section 2 of the ECL. Restricted pesticides also include those products whose labeling bears the statement "Restricted Use Pesticide." Do not include chemicals that are present as *de minimus* concentrations as listed in the SDS for that substance.

For any substance listed that is used in a manner which could cause them to come into contact with a wastewater that is ultimately discharged to the waters of the State through an outfall controlled by this permit application, identify it as "Present" and the Outfall(s) by which it may be discharged. Sampling results for these pollutants should also be included with Tables B-E.

☐ A separate, but equivalent table has been attached as part of this application.

Substance Name	CAS Number	Purpose of Use Code	Average Annual Usage	Amount On Hand	Presence in Discharge	Discharge Outfall
		PRO - Produced	Gal	Gal	☐Present ☐Not Present

TABLE H. FACILITY & COLLECTION SYSTEM RESILIENCY

Pump Station Name	PS Owner	General Location	Latitude (DMS)	Longitude (DMS)	Floor Elevation (ft, NAVD88)
Complete this table for all pump stations that exist at the wastewater treatment facility and within the collection system. Identify the name of the pump station, the owner of the pump station (if different than the SPDES permittee), the general location of the pump station (e.g. intersection of Green St. & Water St.), the latitude and longitude of the pump station in degrees-minutes-seconds (DMS) format, and the elevation in feet of the pump station floor (per the NAVD88 datum).					
☑ The wastewater treatment facility and collection system do not contain any pump stations.

JOB DESCRIPTION

EMGPRP

JOB NUMBER

410-152590-1

Eurofins Lancaster Laboratories Environment Testing, LLC
2425 New Holland Pike
Lancaster PA 17601

See page two for job notes and contact information.

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Compliance Statement

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments.
· QC results that exceed the upper limits and are associated with non-detect samples are qualified but further narration is not required since the bias is high and does not change a non-detect result. Further narration is also not required with QC blank detection when the associated sample concentration is non-detect or more than ten times the level in the blank.
· Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD is performed, unless otherwise specified in the method.
· Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.
Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. The foregoing express warranty is exclusive and is given in lieu of all other warranties, expressed or implied, except as otherwise agreed. We disclaim any other warranties, expressed or implied, including a warranty of fitness for particular purpose and warranty of merchantability. In no event shall Eurofins Lancaster Laboratories Environmental, LLC be liable for indirect, special, consequential, or incidental damages including, but not limited to, damages for loss of profit or goodwill regardless of (A) the negligence (either sole or concurrent) of Eurofins Lancaster Laboratories Environmental and (B) whether Eurofins Lancaster Laboratories Environmental has been informed of the possibility of such damages. We accept no legal responsibility for the purposes for which the client uses the test results. Except as otherwise agreed, no purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Project/Site: EMGPRP

Qualifiers

LCMS

Qualifier	Qualifier Description
*5-	Isotope dilution analyte is outside acceptance limits, low biased.
I	Value is EMPC (estimated maximum possible concentration).
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Job ID: 410-152590-1 — Eurofins Lancaster Laboratories Environment

Job Narrative
410-152590-1

REVISION

The report being provided is a revision of the original report sent on 12/13/2023. The report (revision 1) is being revised due to add a comment regarding the meaning of the I qualifier for PFAS analysis.

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 11/28/2023 8:00 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 2.7°C and 3.4°C

Receipt Exceptions
Backup volume for 1633 method was placed in freezer on 11/28/2023.

For the PFAS analysis 410-152590, the I qualifier on the report is used to identify compounds which did not meet the ion ratio criteria.

GC/MS Semi VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

PFAS
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Detection Summary

Question	Answer	Comment
The cooler's custody seal is intact.	N/A	Not present
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature acceptable,where thermal pres is required(</=6C, not frozen).	True	
Cooler Temperature is recorded.	True	
WV:Container Temp acceptable,where thermal pres is required (</=6C, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	True	
Sample custody seals are intact.	N/A	Not present.
VOA sample vials do not have headspace >6mm in diameter (none, if from WV)?	N/A

JOB DESCRIPTION

EMGPRP

JOB NUMBER

410-152759-1

Eurofins Lancaster Laboratories Environment Testing, LLC
2425 New Holland Pike
Lancaster PA 17601

See page two for job notes and contact information.

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Revision 1

Authorized for release by
Megan Moeller, Client Services Manager
Megan.Moeller@et.eurofinsus.com
(717)556-7261

Compliance Statement

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments.
· QC results that exceed the upper limits and are associated with non-detect samples are qualified but further narration is not required since the bias is high and does not change a non-detect result. Further narration is also not required with QC blank detection when the associated sample concentration is non-detect or more than ten times the level in the blank.
· Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD is performed, unless otherwise specified in the method.
· Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.
Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. The foregoing express warranty is exclusive and is given in lieu of all other warranties, expressed or implied, except as otherwise agreed. We disclaim any other warranties, expressed or implied, including a warranty of fitness for particular purpose and warranty of merchantability. In no event shall Eurofins Lancaster Laboratories Environmental, LLC be liable for indirect, special, consequential, or incidental damages including, but not limited to, damages for loss of profit or goodwill regardless of (A) the negligence (either sole or concurrent) of Eurofins Lancaster Laboratories Environmental and (B) whether Eurofins Lancaster Laboratories Environmental has been informed of the possibility of such damages. We accept no legal responsibility for the purposes for which the client uses the test results. Except as otherwise agreed, no purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Qualifiers

LCMS

Qualifier	Qualifier Description
I	Value is EMPC (estimated maximum possible concentration).
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Job ID: 410-152759-1 — Eurofins Lancaster Laboratories Environment

Job Narrative
410-152759-1

REVISION

The report being provided is a revision of the original report sent on 12/12/2023. The report (revision 1) is being revised due to add a comment regarding the meaning of the I qualifier for PFAS analysis.

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 11/29/2023 5:45 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 8.4°C

Receipt Exceptions
Backup volume for 1633 method was placed in freezer on 11/29/2023.

The following samples were received at the laboratory outside the required temperature criteria: Outfall-01A (410-152759-1), Outfall-001 (410-152759-2) and Outfall-002 (410-152759-3). The sample(s) is considered acceptable since it was collected and submitted to the laboratory on the same day and there is evidence that the chilling process has begun.

For the PFAS analysis 410-152759, the I qualifier on the report is used to identify compounds which did not meet the ion ratio criteria.

GC/MS Semi VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

PFAS
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
The cooler's custody seal is intact.	N/A	Not present
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature acceptable,where thermal pres is required(</=6C, not frozen).	False	Received same day of collection; chilling process has begun.
Cooler Temperature is recorded.	True	
WV:Container Temp acceptable,where thermal pres is required (</=6C, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	True	
Sample custody seals are intact.	N/A	Not present.
VOA sample vials do not have headspace >6mm in diameter (none, if from WV)?	N/A

JOB DESCRIPTION

EMGPRP

JOB NUMBER

410-156219-1

Eurofins Lancaster Laboratories Environment Testing, LLC
2425 New Holland Pike
Lancaster PA 17601

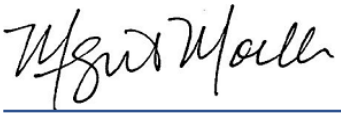
See page two for job notes and contact information.

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Authorization



Generated
1/8/2024 5:32:56 PM

Authorized for release by
Megan Moeller, Client Services Manager
Megan.Moeller@et.eurofinsus.com
(717)556-7261

Compliance Statement

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments.
· QC results that exceed the upper limits and are associated with non-detect samples are qualified but further narration is not required since the bias is high and does not change a non-detect result. Further narration is also not required with QC blank detection when the associated sample concentration is non-detect or more than ten times the level in the blank.
· Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD is performed, unless otherwise specified in the method.
· Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.
Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. The foregoing express warranty is exclusive and is given in lieu of all other warranties, expressed or implied, except as otherwise agreed. We disclaim any other warranties, expressed or implied, including a warranty of fitness for particular purpose and warranty of merchantability. In no event shall Eurofins Lancaster Laboratories Environmental, LLC be liable for indirect, special, consequential, or incidental damages including, but not limited to, damages for loss of profit or goodwill regardless of (A) the negligence (either sole or concurrent) of Eurofins Lancaster Laboratories Environmental and (B) whether Eurofins Lancaster Laboratories Environmental has been informed of the possibility of such damages. We accept no legal responsibility for the purposes for which the client uses the test results. Except as otherwise agreed, no purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Job ID: 410-156219-1 — Eurofins Lancaster Laboratories Environment

Job Narrative
410-156219-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 1/2/2024 7:45 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.8°C

Metals
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Detection Summary

Client: Roux Environmental Eng & Geology DPC
Job ID: 410-156219-1
Project/Site: EMGPRP

Client Sample ID: Outfall-001 — Lab Sample ID: 410-156219-1

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Authorization

1/8/2024 7:44:42 PM

Authorized for release by
Megan Moeller, Client Services Manager
Megan.Moeller@et.eurofinsus.com
(717)556-7261

Compliance Statement

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments.
· QC results that exceed the upper limits and are associated with non-detect samples are qualified but further narration is not required since the bias is high and does not change a non-detect result. Further narration is also not required with QC blank detection when the associated sample concentration is non-detect or more than ten times the level in the blank.
· Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD is performed, unless otherwise specified in the method.
· Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.
Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. The foregoing express warranty is exclusive and is given in lieu of all other warranties, expressed or implied, except as otherwise agreed. We disclaim any other warranties, expressed or implied, including a warranty of fitness for particular purpose and warranty of merchantability. In no event shall Eurofins Lancaster Laboratories Environmental, LLC be liable for indirect, special, consequential, or incidental damages including, but not limited to, damages for loss of profit or goodwill regardless of (A) the negligence (either sole or concurrent) of Eurofins Lancaster Laboratories Environmental and (B) whether Eurofins Lancaster Laboratories Environmental has been informed of the possibility of such damages. We accept no legal responsibility for the purposes for which the client uses the test results. Except as otherwise agreed, no purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Job ID: 410-156315-1 Eurofins Lancaster Laboratories Environment

Job Narrative
410-156315-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 1/3/2024 6:25 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 7.8°C

Receipt Exceptions
The following samples were received at the laboratory outside the required temperature criteria: Outfall-001 (410-156315-1), Outfall-01A (410-156315-2) and Outfall-002 (410-156315-3). The sample(s) is considered acceptable since it was collected and submitted to the laboratory on the same day and there is evidence that the chilling process has begun.

Metals
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Detection Summary

Client: Roux Environmental Eng & Geology DPC
Job ID: 410-156315-1
Project/Site: EMGPRP

Client Sample ID: Outfall-001 — Lab Sample ID: 410-156315-1

Eurofins Lancaster Laboratories Environment Testing, LLC
2425 New Holland Pike
Lancaster PA 17601

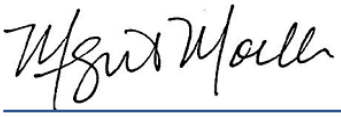
See page two for job notes and contact information.

Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Authorization



Generated
1/10/2024 6:39:53 PM

Authorized for release by
Megan Moeller, Client Services Manager
Megan.Moeller@et.eurofinsus.com
(717)556-7261

Compliance Statement

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments.
· QC results that exceed the upper limits and are associated with non-detect samples are qualified but further narration is not required since the bias is high and does not change a non-detect result. Further narration is also not required with QC blank detection when the associated sample concentration is non-detect or more than ten times the level in the blank.
· Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD is performed, unless otherwise specified in the method.
· Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.
Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. The foregoing express warranty is exclusive and is given in lieu of all other warranties, expressed or implied, except as otherwise agreed. We disclaim any other warranties, expressed or implied, including a warranty of fitness for particular purpose and warranty of merchantability. In no event shall Eurofins Lancaster Laboratories Environmental, LLC be liable for indirect, special, consequential, or incidental damages including, but not limited to, damages for loss of profit or goodwill regardless of (A) the negligence (either sole or concurrent) of Eurofins Lancaster Laboratories Environmental and (B) whether Eurofins Lancaster Laboratories Environmental has been informed of the possibility of such damages. We accept no legal responsibility for the purposes for which the client uses the test results. Except as otherwise agreed, no purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Project/Site: EMGPRP

Qualifiers

Metals

Qualifier	Qualifier Description
^+	Continuing Calibration Verification (CCV) is outside acceptance limits, high biased.
cn	Refer to Case Narrative for further detail

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Job ID: 410-156459-1 — Eurofins Lancaster Laboratories Environment

Job Narrative
410-156459-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 1/4/2024 6:30 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 3.9°C

Metals
Method 1631E: The continuing calibration verification (CCV) associated with batch 350-1026 recovered above the upper control limit for Mercury. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Water Treatment Chemical (WTC) Notification Forms

New York State Department of Environmental Conservation
Division of Water
SPDES Permit - WTC Authorization Request Instructions Page

(July 2023)

APPLICABILITY:

New or increased use and discharge of a Water Treatment Chemical (WTC) requires prior New York State Department of Environmental Conservation (NYSDEC) review and authorization. At a minimum, the permittee must notify NYSDEC in writing of its intent to change WTC use by submitting a completed WTC Form for each proposed WTC. NYSDEC will review that submittal and determine if a SPDES permit modification is first necessary or whether WTC authorization may proceed without a formal permit modification. The majority of WTC authorizations do not require SPDES permit modification. In any event, use and discharge of most WTCs cannot proceed without prior authorization from NYSDEC. NYSDEC staff may also direct you to use this form for review and authorization of other substances which could be present in wastewater.

Examples of WTCs include biocides, coagulants, conditioners, corrosion inhibitors, defoamers, deposit control agents, flocculants, scale inhibitors, sequestrants, and settling aids.

INSTRUCTIONS:

For **each** new or increased use of a WTC, please complete items 1.a., and 2 - 15 on the attached *WTC Authorization Request***.** Some WTC manufacturers may be reluctant to reveal product formulations to the permittee. In those cases the WTC manufacturer may take a partially completed form from the permittee, fill in the remaining information plus items 1.b. and 16, and send the completed form directly to the permit writer. **Email the completed form to: spdesapp@dec.ny.gov**

SPDES ID: 0267724

Permit Class:

County: Kings

Completing Item 8.b. (Outfall WTC Concentration) - In general, the average mg/L should be determined by dividing the average dosage in 7a by the average flow in 8a and then dividing by 8.34; the maximum mg/L should be determined by dividing the maximum dosage in 7a by the average flow in 8a and then dividing by 8.34; however, for blowdowns which are highly intermittent or are not tributary to a treatment system or some form of equalization, it may be appropriate to factor in the information in item 9 when completing this item.

Completing Item 12 (Toxicity Information) - All reported test data must represent tests conducted in accordance with current EPA toxicity testing manuals for appropriate species. Submission of acute (48 or 96 hour LC50 or EC50) and/or chronic (7 day NOEC or IC25) test results for at least one vertebrate and one invertebrate species is required.

In most cases, after reviewing the submission, NYSDEC will send a letter notifying the person identified in item 2.c and, if appropriate, to the facility inspector of the WTC authorization decision.

ADDITIONAL INFORMATION:

Please visit the NYSDEC website at http://www.dec.ny.gov/permits/93245.html for copies of this form, copies of the *WTC Annual Report Form*, and additional information on WTCs.

New York State Department of Environmental Conservation

SPDES Permit - WTC Authorization Request **Page 1 of 2** (July 2023)

For help completing this form refer to instructions page and to http://www.dec.ny.gov/permits/93245.html .

1.a. Date Signed by Permittee - 12/8/23	1.b. Date Signed by WTC Manufacturer - 12/8/23
2.a. Permittee Name - ExxonMobil Oil Corporation	2.b. SPDES No. - NY 0267724
2.c. Contact Name - Michael Burghardt	
3.a. WTC Name - Redux 375	
3.b. WTC Manufacturer - Redux Technology, Div. Azure Water Services, LLC	
4.a. WTC Function - Protects treatment equipment from fouling by calcium carbonate and iron	
4.b. If WTC is a biocide is it NYS registered? Yes No	4.c. Registration Number -
5. WTC Point of Addition - Pre-sand filtration process	
6. Affected Outfall(s) - Outfall 002	
7.a. WTC Daily Dosage: average lbs/day = 180 , maximum lbs/day = 216	
7.b. Dosage Frequency: minutes/day = 1440 , days/week = 7	
8.a. Outfall Flow Rate: average MGD = 1.08 , maximum MGD = 1.30	
8.b. Outfall WTC Concentration: average mg/l = 20 , maximum mg/l = 20	
9.a. System Blowdown Flow Rate: average gpm = N/A , maximum gpm = N/A	
9.b. System Blowdown Frequency: minutes/day = N/A , days/week = N/A	

10.a. WTC Composition - Ingredients/Impurities (note: ingredients/impurities must total to 100%)	10.b. %	10.c. CAS#	10.d. Outfall Concentration
Polymaleic Acid	4.2	26099-09-2	0.84 mg/l
2 phosphono-1,2,4-butanetricarboxylic acid	5.3	37971-36-1	1.06 mg/l
Sodium hydroxide	1.5	1310732	0.30 mg/l
Water	89	7732-18-5	17.80 mg/l
			mg/l
			mg/l
			mg/l

10.e. Intermediate/Final Degradation Products - Water, carbon dioxide, organic acids
11. WTC BOD and COD (lb/lb) - unknown

New York State Department of Environmental Conservation
Division of Water
SPDES Permit - WTC Authorization Request **Page 2 of 2** (July 2023)

1.a. Date Signed by Permittee - 12/8/23	1.b. Date Signed by WTC Manufacturer - 12/8/23
2.b. SPDES No. - NY 0267724	
3.a.. WTC Name - Redux 375	7.a. Avg/Max Daily Dosage = 180 / 216 lbs/day

12. WTC Toxicity Info (most sensitive species) - Attach description of endpoint for each EC50.

12.a. Vertebrate Species	Acute LC50	Acute EC50	Chronic NOEC	Chronic IC25
Cyprinodon variegatus, 96 hr	5,477.2 mg/l	mg/l	mg/l	mg/l
12.b. Vertebrate Species	Acute LC50	Acute EC50	Chronic NOEC	Chronic IC25
	mg/l	mg/l	mg/l	mg/l
12.c. Invertebrate Species	Acute LC50	Acute EC50	Chronic NOEC	Chronic IC25
Mysidopsis bahia, 48 hr	2,194.6 mg/l	mg/l	mg/l	mg/l
12.d. Invertebrate Species	Acute LC50	Acute EC50	Chronic NOEC	Chronic IC25
	mg/l	mg/l	mg/l	mg/l

13. Summarize measures in place to ensure that excessive levels of WTC are not used -

A chemical metering pump, controlled by the System programmable logic controller (PLC), will be utilized to automatically adjust Redux 375 dosage to be proportional to the System process flow rate and maintain a constant WTC concentration in the process water. Operations personnel manually measure and verify chemical feed rate periodically.

14. WTCs to be discontinued when use of this WTC begins – Not Applicable

15. Permittee Certification - I certify under penalty of law that this request and all attachments are, to the best of my knowledge and belief, true, accurate and complete. I also certify that the WTC Usage Requirements and any additional requirements specified in the decision letter I will receive will be adhered to.

New York State Department of Environmental Conservation
Division of Water
SPDES Permit - WTC Authorization Request Instructions Page

(July 2023)

APPLICABILITY:

New or increased use and discharge of a Water Treatment Chemical (WTC) requires prior New York State Department of Environmental Conservation (NYSDEC) review and authorization. At a minimum, the permittee must notify NYSDEC in writing of its intent to change WTC use by submitting a completed WTC Form for each proposed WTC. NYSDEC will review that submittal and determine if a SPDES permit modification is first necessary or whether WTC authorization may proceed without a formal permit modification. The majority of WTC authorizations do not require SPDES permit modification. In any event, use and discharge of most WTCs cannot proceed without prior authorization from NYSDEC. NYSDEC staff may also direct you to use this form for review and authorization of other substances which could be present in wastewater.

Examples of WTCs include biocides, coagulants, conditioners, corrosion inhibitors, defoamers, deposit control agents, flocculants, scale inhibitors, sequestrants, and settling aids.

INSTRUCTIONS:

For **each** new or increased use of a WTC, please complete items 1.a., and 2 - 15 on the attached *WTC Authorization Request***.** Some WTC manufacturers may be reluctant to reveal product formulations to the permittee. In those cases the WTC manufacturer may take a partially completed form from the permittee, fill in the remaining information plus items 1.b. and 16, and send the completed form directly to the permit writer. **Email the completed form to: spdesapp@dec.ny.gov**

SPDES ID: 0267724

Permit Class:

County: Kings

Completing Item 8.b. (Outfall WTC Concentration) - In general, the average mg/L should be determined by dividing the average dosage in 7a by the average flow in 8a and then dividing by 8.34; the maximum mg/L should be determined by dividing the maximum dosage in 7a by the average flow in 8a and then dividing by 8.34; however, for blowdowns which are highly intermittent or are not tributary to a treatment system or some form of equalization, it may be appropriate to factor in the information in item 9 when completing this item.

Completing Item 12 (Toxicity Information) - All reported test data must represent tests conducted in accordance with current EPA toxicity testing manuals for appropriate species. Submission of acute (48 or 96 hour LC50 or EC50) and/or chronic (7 day NOEC or IC25) test results for at least one vertebrate and one invertebrate species is required.

In most cases, after reviewing the submission, NYSDEC will send a letter notifying the person identified in item 2.c and, if appropriate, to the facility inspector of the WTC authorization decision.

ADDITIONAL INFORMATION:

Please visit the NYSDEC website at http://www.dec.ny.gov/permits/93245.html for copies of this form, copies of the *WTC Annual Report Form*, and additional information on WTCs.

SPDES Permit - WTC Authorization Request **Page 1 of 2** (July 2023)

For help completing this form refer to instructions page and to http://www.dec.ny.gov/permits/93245.html .

1.a. Date Signed by Permittee - 12/8/23	1.b. Date Signed by WTC Manufacturer - 12/8/23
2.a. Permittee Name - ExxonMobil Oil Corporation	2.b. SPDES No. - NY 0267724
2.c. Contact Name - Michael Burghardt	
3.a. WTC Name - Redux E50	
3.b. WTC Manufacturer - Redux Technology, Div. Azure Water Services, LLC	
4.a. WTC Function - Coagulant	
4.b. If WTC is a biocide is it NYS registered? Yes No	4.c. Registration Number -
5. WTC Point of Addition - Post sand filtration process	
6. Affected Outfall(s) - Outfall 002	
7.a. WTC Daily Dosage: average lbs/day = 18 , maximum lbs/day = 48	
7.b. Dosage Frequency: minutes/day = 1440 , days/week = 7	
8.a. Outfall Flow Rate: average MGD = 1.08 , maximum MGD = 1.30	
8.b. Outfall WTC Concentration: average mg/l = 0.10 , maximum mg/l = 0.22	
9.a. System Blowdown Flow Rate: average gpm = N/A , maximum gpm = N/A	
9.b. System Blowdown Frequency: minutes/day = N/A , days/week = N/A	

10.a. WTC Composition - Ingredients/Impurities (note: ingredients/impurities must total to 100%)	10.b. %	10.c. CAS#	10.d. Outfall Concentration
Polyaluminum Chlorohydrate	50	53026-85-0	0.11 mg/l
Water	50	7732-18-5	0.11 mg/l
			mg/l
			mg/l
			mg/l
			mg/l
			mg/l

10.e. Intermediate/Final Degradation Products - Aluminum oxide, chlorides, water
11. WTC BOD and COD (lb/lb) - unknown

New York State Department of Environmental Conservation
Division of Water
SPDES Permit - WTC Authorization Request **Page 2 of 2** (July 2023)

1.a. Date Signed by Permittee - 12/8/23	1.b. Date Signed by WTC Manufacturer - 12/8/23
2.b. SPDES No. - NY 0267724	
3.a.. WTC Name - Redux E50	7.a. Avg/Max Daily Dosage = 18 / 48 lbs/day

12. WTC Toxicity Info (most sensitive species) - Attach description of endpoint for each EC50.

12.a. Vertebrate Species	Acute LC50	Acute EC50	Chronic NOEC	Chronic IC25
Cyprinodon variegatus, 48 hr	>10,000 mg/l	mg/l	mg/l	mg/l
12.b. Vertebrate Species	Acute LC50	Acute EC50	Chronic NOEC	Chronic IC25
	mg/l	mg/l	mg/l	mg/l
12.c. Invertebrate Species	Acute LC50	Acute EC50	Chronic NOEC	Chronic IC25
Mysidopsis bahia, 48 hr	2,874.6 mg/l	mg/l	mg/l	mg/l
12.d. Invertebrate Species	Acute LC50	Acute EC50	Chronic NOEC	Chronic IC25
	mg/l	mg/l	mg/l	mg/l

13. Summarize measures in place to ensure that excessive levels of WTC are not used -
Redux E-50 is a coagulant used to precipitate iron in this application. The outfall concentration (8b) has been calculated to include the retention of WTC in sludge solids at 95% (5% in discharge).

14. WTCs to be discontinued when use of this WTC begins – Not Applicable

15. Permittee Certification - I certify under penalty of law that this request and all attachments are, to the best of my knowledge and belief, true, accurate and complete. Revised Detailed Mixing Zone Form

NEW YORK STATE OF OPPORTUNITY | Department of Environmental Conservation

SPDES DISCHARGE PERMIT
Detailed Mixing Zone Form

Clear Form

Purpose & Instructions

The following information will inform the Department's review of your SPDES permit and the resulting effect on the receiving waterbody. Complete the information (one form for each outfall) based on either field observations or schematics/design drawings to the best of your ability. Please see the Mixing Zone Guidance for additional instructions. If an item is unavailable or non-applicable, please describe. Submit with the NY-2A or NY-2C Application Form to SPDESapp@dec.ny.gov.

Facility Name: ExxonMobil Greenpoint Remediation Project SPDES No.: 0267724 Outfall #: 002

NYSDEC Permit Writer: Kirsten Jedd-Barry Receiving Waterbody Class: SD

Email: kirsten.jedd-barry@dec.ny.gov Phone No.: (518) 402-8124

Observation Information

Name & Title of Observer: Alex Policastro Date of Observation: 12/21/2022

Phone Number: (631) 630-2383 Email: apolicastro@rouxinc.com

Name of Receiving Waterbody: Newtown Creek

Weather conditions at time of observation (describe any recent rain/melt events):

None

Avg. Width (ft): 220.0 Avg. Depth (ft): 21.0 Local Depth at Outfall (ft): 2.0 Source: Newtown Creek RIR 2023

Has the receiving waterbody run dry in the last 5 years? ☐Yes ■No

Are tidal conditions present? ■Yes ☐No

Measured Velocity (fps): 0.70 Source or Method: Newtown Creek RIR 2023

Receiving Water Information

All Receiving Waters

Surface Temperature (ºF): 51.5 Bottom Temperature (if depth >10 ft) (ºF): 51.3

Lakes: If receiving waterbody is a lake, attach any available summer and/or winter temperature data.

Describe seasonal variability of receiving waterbody (low-flow conditions, nearby dams, canal operations, stratification):

The Newtown Creek is a tidal influenced estuary and is directly influenced by the tidal flows of the East River. The freshwater flow to the Newtown Creek derives from groundwater, stormwater, and wastewater discharges. The Newtown Creek is approximately 3.8 miles long and feeds into the East River between the neighborhoods of Greenpoint, Brooklyn and Long Island City, Queens. Currently, factories and commercial facilities operate along the creek.

Saline Waterbody

If receiving waterbody is saline (Class SA, SB, SC, SD, I) density information is required.

Surface Density (kg/m^3): 1,002.00 Bottom Density (kg/m^3): 1,006.00

Source of Density Information: field measurement

■Additional information regarding the receiving waterbody is attached (i.e. temperature/ tidal/ density studies).

Effluent Discharge Information

Temperature (ºF): 72.5 AND / OR Density (kg/m^3): Source: Field Measurement

Outfall Location & Configuration

Outfall #: 002 Location at end of pipe: Latitude: 40.728111 Longitude: -73.932349

Describe the outfall (location, size, configuration, condition of the structure):

Outfall 002 is located at the norther terminus of Meeker Ave. The Piping associated with Outfall 002 is constructed of 6" Dia PVC and runs beneath Meeker Avenue before discharging into Newtown Creek. The Pipe penetrates an existing granite bulkhead before elbowing 90 degree downward into Stone Gabion Baskets (to minimize turbidity) approximately 10' above creek bed.

Please select the option below (1 – 3) that best describes your facility's outfall configuration.

☐ I have attached supporting as-built drawings, sketches, or engineering plans to help describe the outfall.

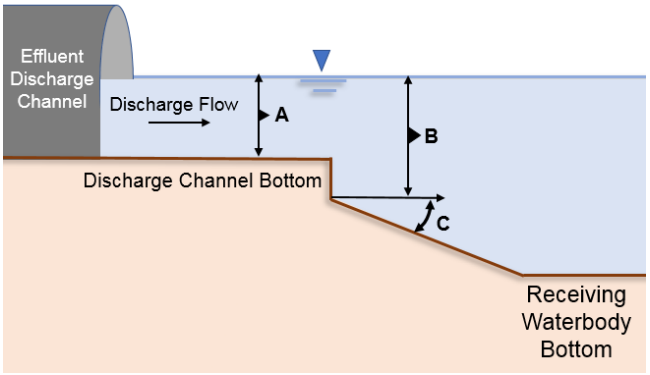
■ **Option #1: Bank Discharge** (outfall pipe/channel does not extend into waterbody).

■ Outfall pipe (6.00 inch diameter) discharges to waterbody at 0.00 feet from bank

- ◉ Outfall pipe is above (or partially above) water surface OR
- ☐ Outfall pipe is submerged and located ____ feet above channel bottom

OR

☐ Channel/ditch (____ft wide x ____ft deep x ____ft long) discharges to waterbody at bank



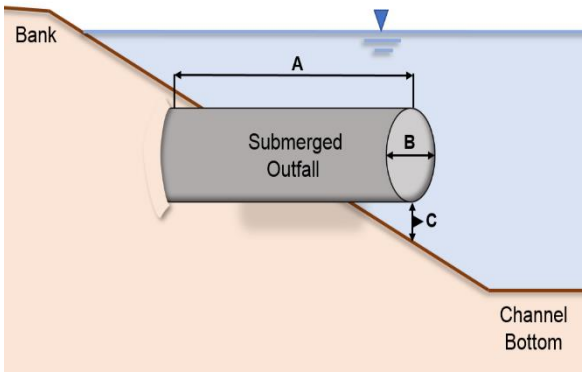
A. Average depth of water in channel (ft): _____

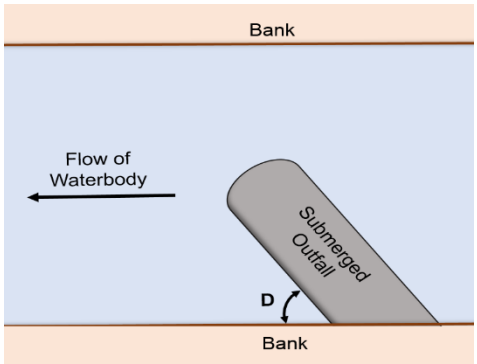
B. Local depth at outfall (ft): _____

C. Bottom slope (degrees): _____

Source: _____

☐ **Option #2: Extended Pipe Discharge** (outfall pipe extends into waterbody) with **no** multiport diffuser.





Source

A. Distance from bank to end of pipe (ft): _____ _____

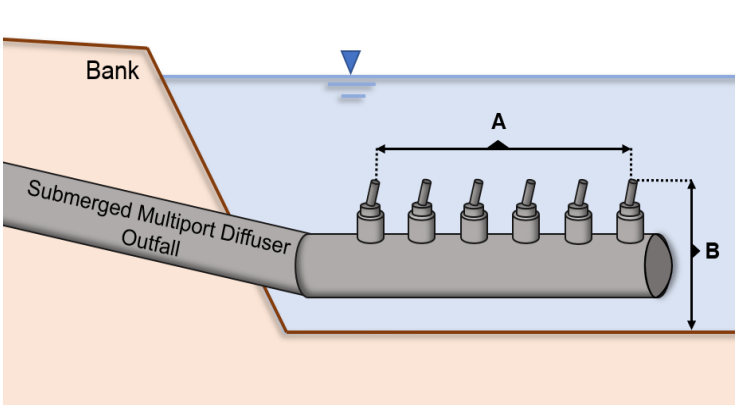
B. Outfall pipe diameter (in): _____ _____

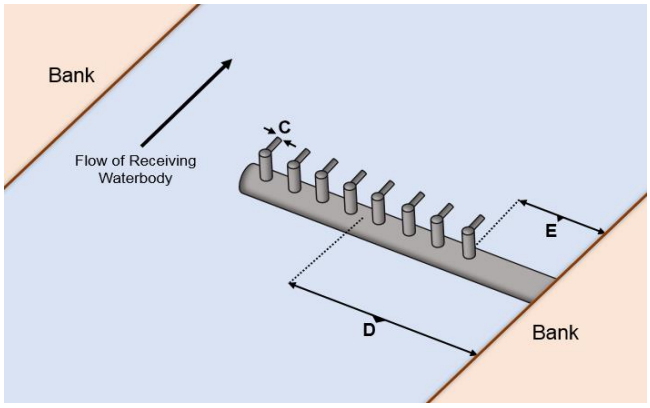
C. Distance from bottom of outfall pipe to immediate bottom of channel (ft): _____ _____

D. Angle between bank and outfall: _____ _____

☐ **Option #3: Extended Pipe Discharge** (outfall pipe extends into waterbody) **with** multiport diffuser.

☐ Attach a detailed drawing of the diffuser (required). If not available, please contact the DEC permit writer.





No. of openings: _____ Orientation: ☐ Unidirectional ☐ Alternating Direction: ☐ Line ☐ Fanned out

		Source
A.	Length of diffuser line (ft):	
B.	Height of discharge (top of diffuser nozzle to channel bottom) (ft):	
C.	Diameter of nozzles (in):	
D.	Distance from bank to middle of diffuser line (ft):	
E.	Distance from bank to first diffuser nozzle (ft):	

Outfall Photos & Schematics

Upload or attach photos/schematics that depict the outfall (i.e. satellite images, hand sketches, design drawings, view upstream/downstream). **You will be prompted twice to select your photo / schematic.** You may upload more than two photos by repeating this process. They will be included as attachments.

Form 70-0117
"Demonstration: Consideration of Future Physical Climate Risk"

SPDES Permit Application Supplemental Information Form

§ 70-0117 Demonstration: Consideration of Future Physical Climate Risk

Following the 2019 Climate Leadership and Community Protection Act (Climate Act), which amended the 2014 Community Risk and Resiliency Act (CRRA), SPDES permit applicants for "major" projects[1] are required to demonstrate consideration of future physical climate risks, including those due to sea level rise, storm surges, and flooding. This form has been developed to assess relevant information to comply with the requirements to consider climate risks.

Applicants should review the Flood Risk Management Guidance or Asset Management Guide for Publicly Owned Treatment Works to identify current and future flood elevations, and to review examples of risk mitigation strategies. The community Floodplain Administrator may be a good resource and can be found by emailing DEC at floodplain@dec.ny.gov.

For all fields provided below, applicants may attach additional sheets as necessary.

Facility

1. a. Facility name	ExxonMobil Greenpoint Petroleum Remediation Pro	b. SPDES No.	NY 0267724

2. a. Does the facility discharge to a tidal waterbody? (Y/N)	Y	b. If yes, what is the high projection for sea level rise (SLR) in 6 NYCRR 490 for the regional area? (feet)	10 inches

3. Please describe the type and extent of any past flooding events at the facility.	No Past Flood events of note
4. What are the applicable Flood Insurance Rate Map (FIRM) Nos. and effective dates?	3604970206F effective date 9/5/2007
5. a. Is any portion of the facility located in a FEMA designated flood zone? If yes, what is the zone type? If no, are there adjacent flood zones that could be considered or skip to question 6.	No, site is Located outside of Zone X, and approximately 350' to the nearest adjacent Flood plane (Newtown creek (Zone X, & Zone AE)
b. What is the lowest ground elevation at the facility? (ft)	
c. What is the Base Flood Elevation (BFE) at the facility? (ft)	
d. What is the **Future BFE** for the facility based on the NYS Flood Risk Management Guidance? *Tidal Areas: BFE + SLR (Method 4) Non-Tidal Areas: Q100 (Method 3 or use available flood profiles from Flood Insurance maps)*	
e. What is the target elevation for critical equipment? **Future BFE** + 3 feet	
f. Compare questions **5.b.** and **5.e.** Is the target elevation greater than the lowest ground elevation?	
6. What climate risk mitigation measures are in place at the facility? Are any future projects anticipated that provide further opportunity to address climate risk?	One of the existing EMGPRP facilities is being relocated from 400 Kingsland Avenue which is within a designated Flood Zone A. The new location at 38 Varick Street will place the treatment facility outside of any designated Flood Zones in the area which will limit exposure to future climate related flood risk.
7. For applications involving facility changes, have any other types of future physical climate risks been considered, including tropical and extratropical cyclones, wind, and changes in average/peak precipitation and temperature?	The location of the new facility at 38 Varick Street limits potential flood related risk by being positioned outside of the existing designated flood zone. The existing facility located at 400 Kingsland Avenue is within a designated flood zone. As such, the new facility at 38 Varick Street outside of the designated flood zone is anticipated to mitigate the potential physical climate risks associated with the existing facility located at the 400 Kingsland Avenue property.

[1] "Major" projects are those identified in Uniform Procedures Act regulations at 6 NYCRR 621.4.

Pump/Lift Station(s)	
8. Are there pump/lift station(s) owned by the permittee? If yes, how many? If no, skip to Certification	No
9. Please describe the type and extent of any past flooding events at the pump/lift station(s).	
10. What are the applicable Flood Insurance Rate Map (FIRM) Nos. and effective dates?	
11. a. Are any pump/lift stations located in a FEMA designated flood zone? If yes, which stations and what zone type? If no, skip to question 11	
b. What is the lowest ground elevation at each pump/lift station? (ft)	
c. What are the BFEs, future BFEs, and target elevations for critical equipment (future BFE + 3 ft) for each pump/lift station?	
d. Compare questions **10.b.** and **10.c.** Are any pump/lift stations below the target elevation?	
12. What climate risk mitigation strategies are in place at the pump/lift stations? Are any future projects anticipated that provide further opportunity to address climate risk?	

Certification Statement	
I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.	✔
I have demonstrated consideration of current and future physical climate risk.	✔

Name (print or type first and last name)	**Official Title**

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations (BFEs) shown on this map apply only landward of 0.0' National Geodetic Vertical Datum of 1929 (NGVD 29). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was New York State Plane FIPSZONE 3104. The **horizontal datum** was NAD 83, GRS80 spheroid. Differences in datum, spheroid, projection or State Plane zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the National Geodetic Vertical Datum of 1929. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov or contact the National Geodetic Survey at the following address:

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at **(301) 713-3242**, or visit its website at http://www.ngs.noaa.gov.

Base map information shown on this FIRM was provided in digital format by the Department of Information Technology and Telecommunication, City of New York. This information was derived from digital orthophotos produced at a scale of 1':1,200 with 2-foot pixel resolution from photography dated 2004.

Based on updated topographic information, this map reflects more detailed and up-to-date **stream channel configurations and floodplain delineations** than those shown on the previous FIRM for this jurisdiction. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study Report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map. Also, the road to floodplain relationships for unrevised streams may differ from what is shown on previous maps.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map showing the layout of map panels for this jurisdiction.

Contact the **FEMA Map Service Center** at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://msc.fema.gov.

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call **1-877-FEMA MAP** (1-877-336-2627) or visit the FEMA website at http://www.fema.gov.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood.

ZONE A	No Base Flood Elevations determined.
ZONE AE	Base Flood Elevations determined.
ZONE AH	Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.
ZONE AO	Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fan flooding, velocities also determined.
ZONE AR	Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.
ZONE A99	Area to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevations determined.
ZONE V	Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined.
ZONE VE	Coastal flood zone with velocity hazard (wave action); Base Flood Elevations determined.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights.

OTHER FLOOD AREAS

ZONE X	Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X	Areas determined to be outside the 0.2% annual chance floodplain.
ZONE D	Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Areas.

	1% annual chance floodplain boundary
	0.2% annual chance floodplain boundary
	Floodway boundary
	Zone D boundary
	CBRS and OPA boundary
	Boundary dividing Special Flood Hazard Area Zones and boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
513	Base Flood Elevation line and value; elevation in feet*
(EL 987)	Base Flood Elevation value where uniform within zone; elevation in feet*

* Referenced to the National Geodetic Vertical Datum of 1929

A23	Cross section line
A23	Transect line
87°07'45", 32°22'30"	Geographic coordinates referenced to the North American Datum of 1983 (NAD 83), Western Hemisphere
2°76'000"N	1000-meter Universal Transverse Mercator grid values, zone 18
600000 FT	5000-foot grid ticks: New York State Plane coordinate system, Long Island zone (FIPSZONE 3104), Lambert Conformal Conic projection
DX5510 ×	Bench mark (see explanation in Notes to Users section of this FIRM panel)
●M1.5	River Mile
